

ANBU SELVAN T

AI & Embedded Systems Engineer | Agentic AI Fundamentals, LLM Application Development, Embedded IoT

Chennai, India | +91 73059 78207 | anbu.t80555@gmail.com

LinkedIn: [linkedin.com/in/anbuselvan-t-b07b63368](https://www.linkedin.com/in/anbuselvan-t-b07b63368) | GitHub: github.com/ANBU-SELVAN-1907

PROFESSIONAL SUMMARY

AI & Embedded Systems undergraduate (CGPA 8.50/10) building hands-on, foundational experience in agentic AI, multi-agent systems, and LLM application development with Claude Sonnet and Google Gemini. Built an application discovery agent automating codebase architecture analysis and compliance reporting during a Deloitte Touche Tohmatsu internship, backed by solid, practical experience in real-time embedded development (STM32, ESP32, Raspberry Pi).

TECHNICAL SKILLS

Agentic AI & LLM Engineering: Multi-Agent System Fundamentals (CrewAI, LangGraph), LLM Application Development (LangChain, Claude Sonnet, Google Gemini), Automated Code & Architecture Discovery, Compliance & Security-Posture Analysis

Backend & APIs: FastAPI, REST API Design & Integration

Embedded Systems & IoT: STM32, ESP32, Raspberry Pi, Linux-Based Embedded Development, Edge AI & IoT Electronics, Real-Time Data Acquisition

Conversational & Voice AI: Speech-to-Text (STT), Text-to-Speech (TTS), Voice Recognition, LiveKit Agent Framework

Cloud (AWS): EC2, Lambda, Bedrock, S3, IAM

Programming & Additional Skills: Python (Data Science & ML Fundamentals), Robotics & Automation, Project Leadership

PROFESSIONAL EXPERIENCE

Deloitte Touche Tohmatsu India LLP

Jun 2026 – Sept 2026

AI Engineering & Data Intern, Technology & Transformation (T&T) | T. Nagar, Chennai

- Designed and built an application discovery agent that automates codebase architecture analysis for enterprise engagements within the T&T practice.

Indian Institute of Technology Ropar (IIT Ropar)

Feb 2026 – Present

Cyber-Physical Systems (CPS) Lab, Undergraduate Intern | HITS Campus, Chennai

- Contribute to the design and integration of AI-driven IoT and robotics systems as part of the CPS Lab's ongoing research initiatives.

TECHNICAL PROJECTS

Application Discovery Agent

Jun 2026 – Aug 2026

Featured Project | Submitted to Deloitte Touche Tohmatsu India LLP

- Independently designed the discovery pipeline — from code-pattern parsing through compliance-report and topology-blueprint generation — applying early-stage multi-agent orchestration techniques.
- Engineered parsing logic to map code dependencies, logical API endpoints, and security posture — generating compliance reports and topology blueprints directly from source code.
- Applied foundational multi-agent orchestration techniques to structure the discovery workflow, improving the consistency of automated architecture analysis.

Jarvis AI Voice Assistant

Jun 2025 – Sep 2025

Raspberry Pi 3B+, LiveKit Agent, Google Gemini Cloud LLM

- Built a real-time conversational AI voice assistant on Raspberry Pi 3B+, integrating the LiveKit Agent framework with Google's Gemini Cloud LLM for natural dialogue.
- Implemented STT and TTS pipelines to enable low-latency, real-time voice interaction on edge hardware.

Real-Time Air Quality Monitoring System

Jan 2026 – Feb 2026

Weather Prediction & Windy Platform Integration | STM32, ESP32, Raspberry Pi

- Developed a real-time air quality monitoring system using STM32, ESP32, and Raspberry Pi for high-frequency environmental sensor data acquisition.
- Integrated the Windy weather platform to combine live sensor readings with weather forecasting for more informed predictions.

EDUCATION

Hindustan Institute of Technology and Science (HITS), Chennai

2024 – 2028 (Expected)

B.Tech, CSE — Artificial Intelligence and Data Science | CGPA: 8.38/10 (Till 3rd year – 5th sem)

Velammal Vidhyashram, Chennai

2024

12th Grade (MPCC) | Percentage: 75%

LEADERSHIP & ACTIVITIES

AWS Cloud Club, HITS Campus — Technical Team Member

Feb 2026 – Present

- Coordinate technical stack decisions and initiatives as part of the AWS Cloud Club technical team.
